

Advanced Trading Techniques

About the course:

CITAC's Advanced Trading Techniques course follows on from and expands upon the concepts and methods learnt during the CITAC Comprehensive Oil Trading Course.

The course explains and covers the use of Risk Management instruments to mitigate price risk.

Participants will learn methods to limit or off set price risk either directly or with their counterparties.

It assumes a prior knowledge of oil trading and it is recommended that participants without experience attend a CITAC Foundation Oil Trading Course prior to enrolling.

Who should attend:

- Refiners
- Crude oil producers
- Products importers
- Government Energy regulators
- Distribution companies
- Utility company buyers
- Finance institutions involved in cargo and stock financing

Venue information:

Dennis House
Plot TC15
Harbor Road
Tema, GHANA

Topics covered include:

- **Identifying and managing price risk in crude oil and products**
Understanding and use of:
 - Futures
