CITAC's Africa Downstream Database

ADD⁺
Africa Downstream Database

The Africa Downstream Database gives you access to the most accurate, extensive and up-to-date data on Africa's petroleum sector available anywhere in the world.

1650	**54**	**699**	**30+**	**20,600**
facilities across - 71 Refineries 1397 Depots 61 Pipelines & 124 Ports	Countries - Data on GDP, Population and other essentials	Product Specifications - Official specifications plus Typical quality for Imports & Exports	Years of Data - Extensive supply & demand figures	Data Points - Retail Prices & Scans of Official Price Structures

ADD⁺ is a proprietary database designed and built by CITAC using the latest online database tools, which stores, retrieves, sorts and charts information on:

- **General information:** African countries' GDP data, foreign exchange and profile information.

- **Supply/Demand:** Data on consumption, imports, exports and refinery output for refined oil products from LPG through to fuel oil and bitumen. Historical data for at least 10, usually 20 years, and demand forecasts, by country and by product, currently running to 2035.

- **Oil products specifications:** extensive database of official national specifications and typical product qualities (i.e. refinery output).

- **African oil-related infrastructure:** detailed information on all operational oil refineries, as well as ports, product (and crude oil) storage facilities and pipelines, including unit capacity, ownership and contact details.

- **Image library:** including refinery flow charts, photographs and maps of installations, original text of government decrees (e.g. price structures).

- **Pricing information:** on ex-refinery and inland pricing structures and pump prices of key commodities such as gasoline, kerosene and gasoil.

Information from the database is available via Excel spreadsheets that you can integrate directly into your own in-house systems.

The Africa Downstream Database is available as part of a subscription to **CITAC Services.** CITAC offers various packages including access to : CITAC market reports, monthly short term balances, CITAC's Africa Downstream Database (ADD⁺), annual presentation, country overviews and CITAC resources.
