

Solving Oil Product Supply Chain Challenges

16-19 September 2024 - Accra, Ghana

Intense competition and razor thin margins put supply chain efficiency at the core of a profitable supply and distribution business.

CITAC's course 'Solving Oil Product Supply Chain Challenges' introduces analytical methods for identifying areas for improvement as well as covering industry best practise. During this 4 day course, participants cover topics such as risk assessment, optimal product sourcing, contractual technicalities, KPI analysis and more, with case studies included to contextualise the knowledge.

Operating in Africa

The course will cover the dynamics of oil product trade flows both on the continent and globally focusing on:

- International & African market developments
- African oil product supply and demand
- Oil product supply infrastructure in Africa
- Key market players & strategies in Africa
- Overview of the most common supply chains

Supply chain resilience

Ensuring quality, quantity, and timing is essential for running an optimised business – this requires rigorous planning and thorough scheduling. This part of the course will focus on:

- Balancing supply & demand
- Volume vs margin
- Demand planning
- Inventory optimisation
- Knowing your costs, capacity and capability
- Risk assessment
- Scheduling and replenishment planning
- Profitability analysis

Sales and operations planning

This part of the course drills down into the methods behind robust supply chain operations and centres on:

- Purpose & value
- Key process ingredients
- Ownership & stakeholders
- Key activities
- Design & work flow
- IT and information sharing
- Metrics & KPIs
- Linkage to business & strategic planning
- Roll up to global S&OP

Supply planning

Participants will thoroughly cover manufacturing & transaction processes along with contractual terms:

- Product Sourcing
- Manufacturing
 - How each product is made
 - Key product specs & what influences them
 - Introduction to refinery margins
- Imports: pricing and freight
 - Price references, base quotes & value of premia/discounts
 - Pricing mechanisms
 - Introduction to world scale, premia & shipping freight

- Imports
 - Contractual terms
 - CIF, CFR, FOB, DET
 - Title risk
 - Demurrage
 - Quality & Quantity
- Optimal Sourcing

Strategic impact

The course introduces methodologies that participants can take with them to apply in real world applications, such as:

- Supply chain SWOT
- Competitor analysis
- Customer value proposition
- Portfolio concept

Case studies

Case studies are used as a basis for introducing final concepts and contextualising the topics covered

- Gap analysis
- Building a benefit case

Who should attend?

- Downstream market newcomers
- Government energy regulators
- Supply Chain Managers
- Importers & exporters of oil products
- Refiners
- Distribution companies
- Finance industry professionals: investment bankers, lenders and project developers
